

- \* The WPI comprises as full members ~ 30 „excellence group leaders“ : ERC grants, EU Marie Curie Networks, Wittgenstein - START awards, FWF SFB & Doktoratskollegs, WWTF Research Group leaders,...

- \* The WPI hosts the Unité Mixte Internationale „Institut CNRS Pauli“ and a similar cooperation with INRIA.

- \* The WPI hosts/coordinates numerous research (training) projects funded by EU, Austrian FFG, FWF, WWTF,...

- \* Annual WPI budget: 1 - 2 Million Euro, more than 2/3 from its own grants in competitive calls.

Wolfgang Ernst Pauli (25 April 1900 – 15 December 1958)  
Vienna born quantum physicist & mathematician

*The WPI is co-funded by the Austrian ministry of science (BM.BWF) for running the international interdisciplinary WPI Thematic Programs and the related Fellowship programs:*

„Olga Taussky Pauli Fellowships“  
„Pauli Fellowships“  
„Pauli Postdocs“  
„Pauli Scholarships“

The Wolfgang Pauli Institute, legally an independent non-profit association, was initiated by a handful of START and Wittgenstein awardees, in a perfect “bottom-up” approach. Our main motivation: to use the personal awards to create a structure that boosts international interdisciplinary research & training and benefits also other and future scientists in Vienna, Austria, Europe and worldwide.

- 1) Creating *"interdisciplinarity"* without losing the excellence in each scientific field by linking existing excellent groups by joint projects and Thematic Programmes with international visitors.
- 2) Creating *infrastructure and optimal administration* for high level grant projects – use the money as efficient as possible. Create *"project sustainability"* after the award grant is finished.
- 3) Being a *synergetic partner*, not a competitor, of the existing Austrian universities.
- 4) *Linking Vienna* to places like Courant, Oxbridge, ICL, ENS+U Paris, Nice, LMU+TU München, FU+HU+TU Berlin, ETH Zürich, U. Roma, KAUST, Peking+Tsinghua, Fudan+Jiao Tong U,...
- 5) *Reinforcing Vienna* by bringing in top senior scientists as *“(Olga Taussky) Pauli fellows”* and top junior scientists as *“Pauli Postdocs”* for a very fast creation of new teams in *“hot topics”*.
